

QUICK CLIP

SOLAR PANEL CONNECTOR

Get to Know Your Gear

TWIST IT

The green lever turns a full 360° so you can lock panels in place and get to them easily.

CONNECT IT

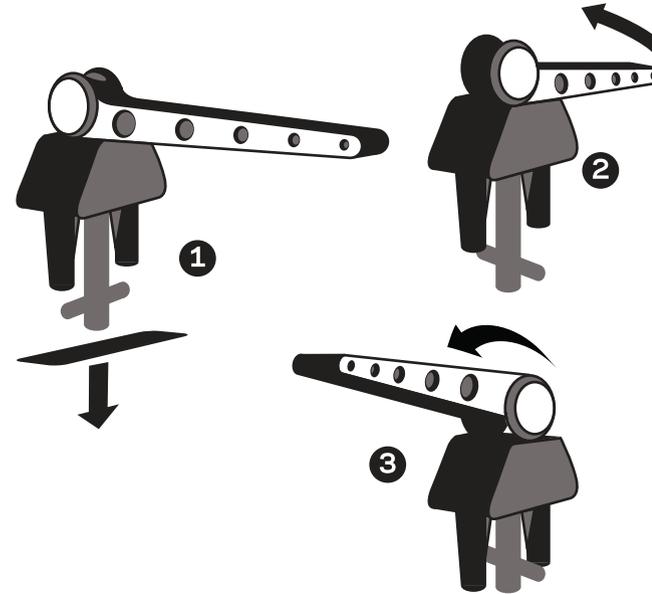

The pronged end fits securely through the side slots on GOAL ZERO BOULDER solar panels.

Getting Started

1. Be sure to **ACTIVATE YOUR WARRANTY** at www.GOALZERO.com/warranty
2. Line up BOULDER solar panels so that the holes are even.
3. Insert the QUICK CLIP through both panels and twist.

How to Use Your Gear

- 1 Insert**
Align panel QUICK-CLIP holes. Insert pronged end. Push all the way down so the base is rested against panel. Make sure lever is perpendicular to panels.
- 2 Secure**
Twist lever 45° in either direction.
Lock
Flip lever completely over and lock into position. You will feel it become secure.

Technical Specs

General

Length	2.5 in
Dimensions	4x.75x1 in (10.16x1.9x2.5 cm)
Warranty	12 months

Frequently Asked Questions

What solar panels will the QUICK CLIPS work with?

QUICK CLIPS are meant for use with any GOAL ZERO BOULDER solar panel.

Can I chain different types of BOULDER panels together with the QUICK CLIPS?

No. The length separating the bracket holes on GOAL ZERO BOULDER panels varies based on stability and structure, so BOULDER 30s can only be connected to BOULDER 30s, and BOULDER 15s can only be connected to BOULDER 15s.

How many QUICK CLIPS do I need to hold two panels together?

QUICK CLIPS are strong, but they are not invincible. You should use at least 2 per side for the best structural integrity.

Compatible With

GOAL ZERO products:

BOULDER 15 solar panel
BOULDER 30 solar panel
